*The Toy Maker's Key (Every Now and Then)* is a mystery novel about a simple man named Jim who had a simple plan, until chance (or fate) took him on a journey to another place and time. His journey was recorded on logs and tells the tale of the most dangerous serial killer ever to walk the face of the earth.

This book was put together after Jim's last set of logs were found. His final logs were written on Friday the 13th, 2006. This book was put together the following day with the hope that it may somehow help find him: because, as of today, he's still missing.
